

ABOUT DR IHOR BASKO, DVM www.drasko.com

Dr Ihor Basko, DVM graduated from Michigan State University with special interests in Internal medicine, cardiology and bone surgery. Since 1971 he has been devoted to the study and practice of acupuncture, herbal medicines, dietary therapy, homeopathy, massage, and other alternative therapies for animals.

I adopted Holistic medicine into my veterinary work because it focuses on the true nature of healing - prevention of chronic disease. Holistic treatments have no side-effects and it combines the best of both traditional veterinary care and alternative therapies.

In addition to treating animals, Dr. Basko is also an educator and leading authority on holistic animal health. He is one of the founders and current President of the Veterinary Botanical Medical Association. He frequently lectures to veterinarians, animal trainers, and animal caretakers on the use of Holistic modalities in Hawaii, North America and Asia. Aside from lecturing, he has published many magazine articles, chapters in books and journals, has been a guest on numerous TV and radio shows and has partnered with [Genesis Resources](#) in the development of a herbal and mineral pet supplements line of products. Dr. Basko believes that Holistic medicine is the best way to preserve good health and prevent illness.
